### SKILLS:

- Hands-on experience in full-stack web development, creating responsive and userfriendly interfaces using HTML, CSS, JavaScript, and Bootstrap, Git .
- Proficient in backend development with Node.js and Express.js, building scalable APIs and web applications
- Practical knowledge (SQL) of MySQL and MongoDB for data storage, querying, and management .Besides I work on Git and I upload my project there.
- Foundational understanding of Java and Python, including core programming concepts and object-oriented principles
- Quick learner passionate about writing clean, maintainable code and continuously adopting new technologies

### EDUCATION:

- Currently pursuing a Bachelor of Computer Science at City University Malaysia, maintaining a strong CGPA of 3.40 and expected to graduate in 2025. Dedicated to deepening my knowledge in software development, algorithms, and data structures while gaining hands-on experience in real-world projects.
- Completed Higher Secondary education at Notre Dame College, Bangladesh, with an impressive CGPA of 3.83, demonstrating a solid academic foundation and commitment to excellence. **EXPERIENCE:**

- Samsung, Bangladesh | Sales Representative (2020 – 2022)

Managed customer interactions and sales processes, contributing to increased

customer satisfaction and achieving sales targets. **ACADEMIC PROJECTS:**

- Project: Treatment-Finder Web Application

User-friendly website to find nearby doctors in Bangladesh with location-based search and interactive UI.

- Non Academic Project: WanderLust (In Progress)

Developing a global short-term rental booking platform with real-time features and seamless UX.

## **HOBBIES:**

- I enjoy development, solving coding challenges and learning new technologies. I love creating projects that are useful for people and society. In my free time, I stay active by playing football and badminton to mind fresh.
